

# Sample File for Encryption & Decryption

This is a simple PDF document created for testing the File Encryption & Decryption Tool. You can use this file as input to verify that encryption and decryption work correctly. The tool should be able to encrypt this file into an unreadable format, and then decrypt it back to the original content.

Content Line 1: Hello, Encryption!

Content Line 2: Testing AES Encryption.

Content Line 3: Decryption should restore this text.
